

Bharat Petrol Pump Dashboard

Project Overview

The Bharat Petrol Pump Dashboard is an interactive business analytics dashboard developed using Power BI.

The main goal of this project is to analyze petrol pump sales performance, customer trends, fuel distribution, and revenue insights using visual analytics and KPI tracking.

This dashboard helps in understanding:

- Overall sales performance
 - Fuel-wise revenue contribution
 - Customer purchasing trends
 - Monthly and daily sales analysis
 - Business decision-making through KPIs
-

Objective

The objective of this project is to:

- Monitor petrol pump sales performance
 - Analyze fuel consumption trends
 - Track total revenue and transactions
 - Create an interactive and user-friendly dashboard
 - Generate business insights for better decision-making
-

Tools & Technologies Used

Tool	Purpose
Power BI	Dashboard Development
DAX	KPI & Measure Calculations
Power Query	Data Cleaning & Transformation
CSV Dataset	Data Source

Dataset Information

The dataset contains:

- Fuel Type
 - Sales Amount
 - Liters Sold
 - Transaction Date
 - Customer Information
 - Payment Method
 - Location Details
-

Data Cleaning Process

Data cleaning and transformation were performed using Power Query in Power BI.

Steps Performed:

- Removed null values
 - Corrected data types
 - Handled duplicate records
 - Formatted date columns
-

Dashboard Features

KPI Cards

- Total Sales
- Total Revenue
- Total Liters Sold
- Total Transactions

Interactive Visualizations

- Fuel Type Analysis
- Monthly Sales Trend
- Revenue Comparison
- Customer Insights
- Payment Method Distribution

Filters & Slicers

- Date Filter
- Fuel Type Filter
- Location Filter

DAX Measures Used

Total Sales = SUM(Bharat_Petrol[Sales_Amount])

Total Liters Sold = SUM(Bharat_Petrol[Liters_Sold])

Average Sales = AVERAGE(Bharat_Petrol[Sales_Amount])

Total Transactions = COUNTROWS(Bharat_Petrol)

Key Insights

- Petrol generated the highest revenue among all fuel types.
 - Weekend sales were higher compared to weekdays.
 - Digital payments increased significantly over time.
 - Evening hours recorded peak sales activity.
 - Monthly revenue trends showed seasonal fluctuations.
-

Conclusion

The Bharat Petrol Pump Dashboard successfully provides a complete overview of sales performance and customer trends through interactive visualizations and KPI tracking.

This project improved practical knowledge in:

- Data visualization
 - Dashboard design
 - DAX calculations
 - Business analytics
 - Data storytelling
-

Future Improvements

- Real-time data integration
 - Predictive sales forecasting
 - Mobile dashboard optimization
 - AI-based business insights
-
